Intense Competition

Topic

Topic

How to create a ***new competitive advantage*** by digital transformation?

Analysis Unit

Analysis Unit

Examine the comprehensive ***transformation roadmap*** and identify the ***distinctive features*** that set us apart from other financial firms.

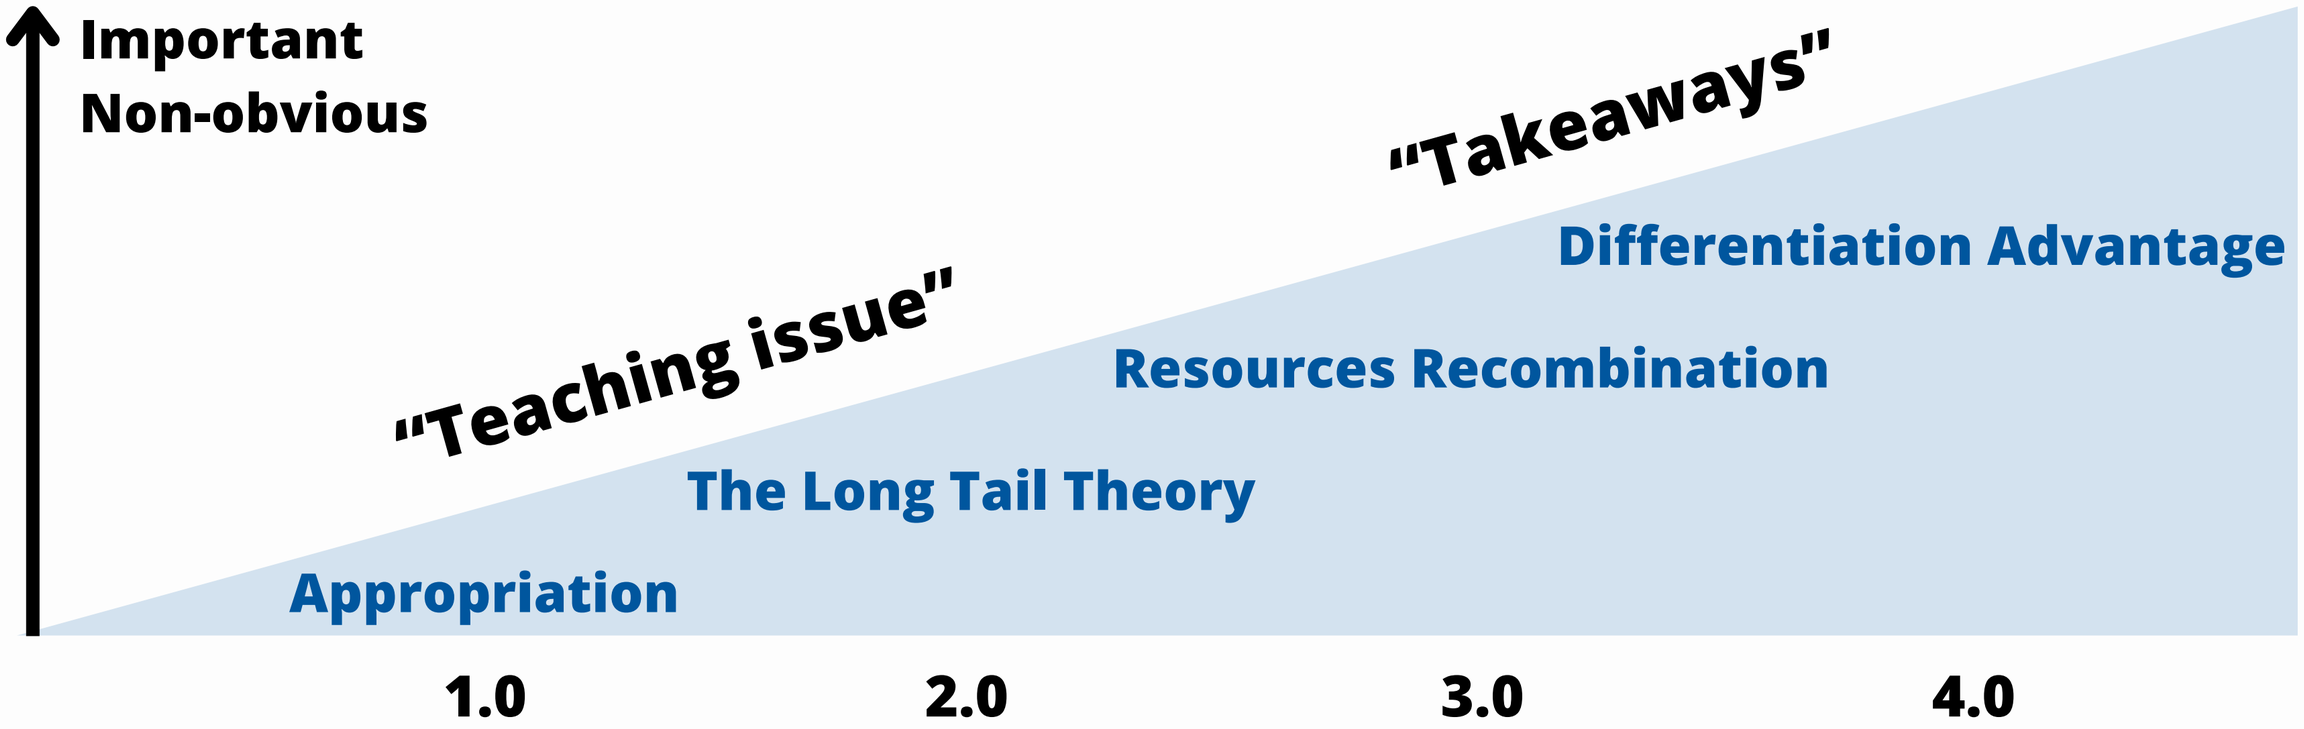

Theoretical Application

Theoretical Application

Aspiration of Transformation Direction	Appropriate from successful cases
Customer-oriented Service	The Long Tail Theory
Leveraging Resources	Resources Recombination
Creating Competitive Advantage	Differentiation Advantage

THEORETICAL APPLICATION

Case: Digital applications for SinoPac transformation.

Theoretical Application

1.0

Appropriation

Appropriation refers to the way in which technology is adjusted and repurposed for new uses by individuals. It highlights the dynamic ways to modify technology for suiting specific needs.

- Extending from FUTU holdings
- Comprehensive digital financial technology platform
- The beginning of digital transformation

2.0

The Long Tail Theory

Long Tail Theory describes a market shift from mainstream to diverse products. Despite initially low sales, overlooked products still have potential to exceed mainstream products due to large cumulative quantity.

- Adjustment in business strategy
- Customer-oriented Service
- Extending resources and content
- From corporate clients to the broader audience

Theoretical Application

3.0

Resources Recombination

Resources Recombination refer to the process of combining existing resources, such as knowledge, technologies, skills, and assets, in novel ways to create new value or competitive advantages.

- Limited resources
- Establishing new departments
- Customer resource conflicts
- Technological expertise and related systems

4.0

Differentiation Advantage

Differentiation Advantage refers to a competitive strategy in which a company seeks to distinguish its products or services from those of its competitors in ways that are valued by customers. The goal of differentiation is to create a unique and appealing offering that sets a company apart in the marketplace.

- Competitive environment
- Different positioning within the same industry

Theoretical Application

SinoPac adopts **Appropriation** to transplant the operational model and create a comprehensive digital financial technology platform. Guided by **the Long Tail Theory**, emphasizing on customer-centric approaches, while extending resources and content originally designed for corporate clients to the broader consumer audience. SinoPac leverages **resource recombination** to establish a new department dedicated to digital financial services. In this competitive market, having a **differentiation advantage** is essential for standing out.
